
Welcome to our Shyneria
JOURNEY BACK TO SHYNERIA
WELCOME ALL

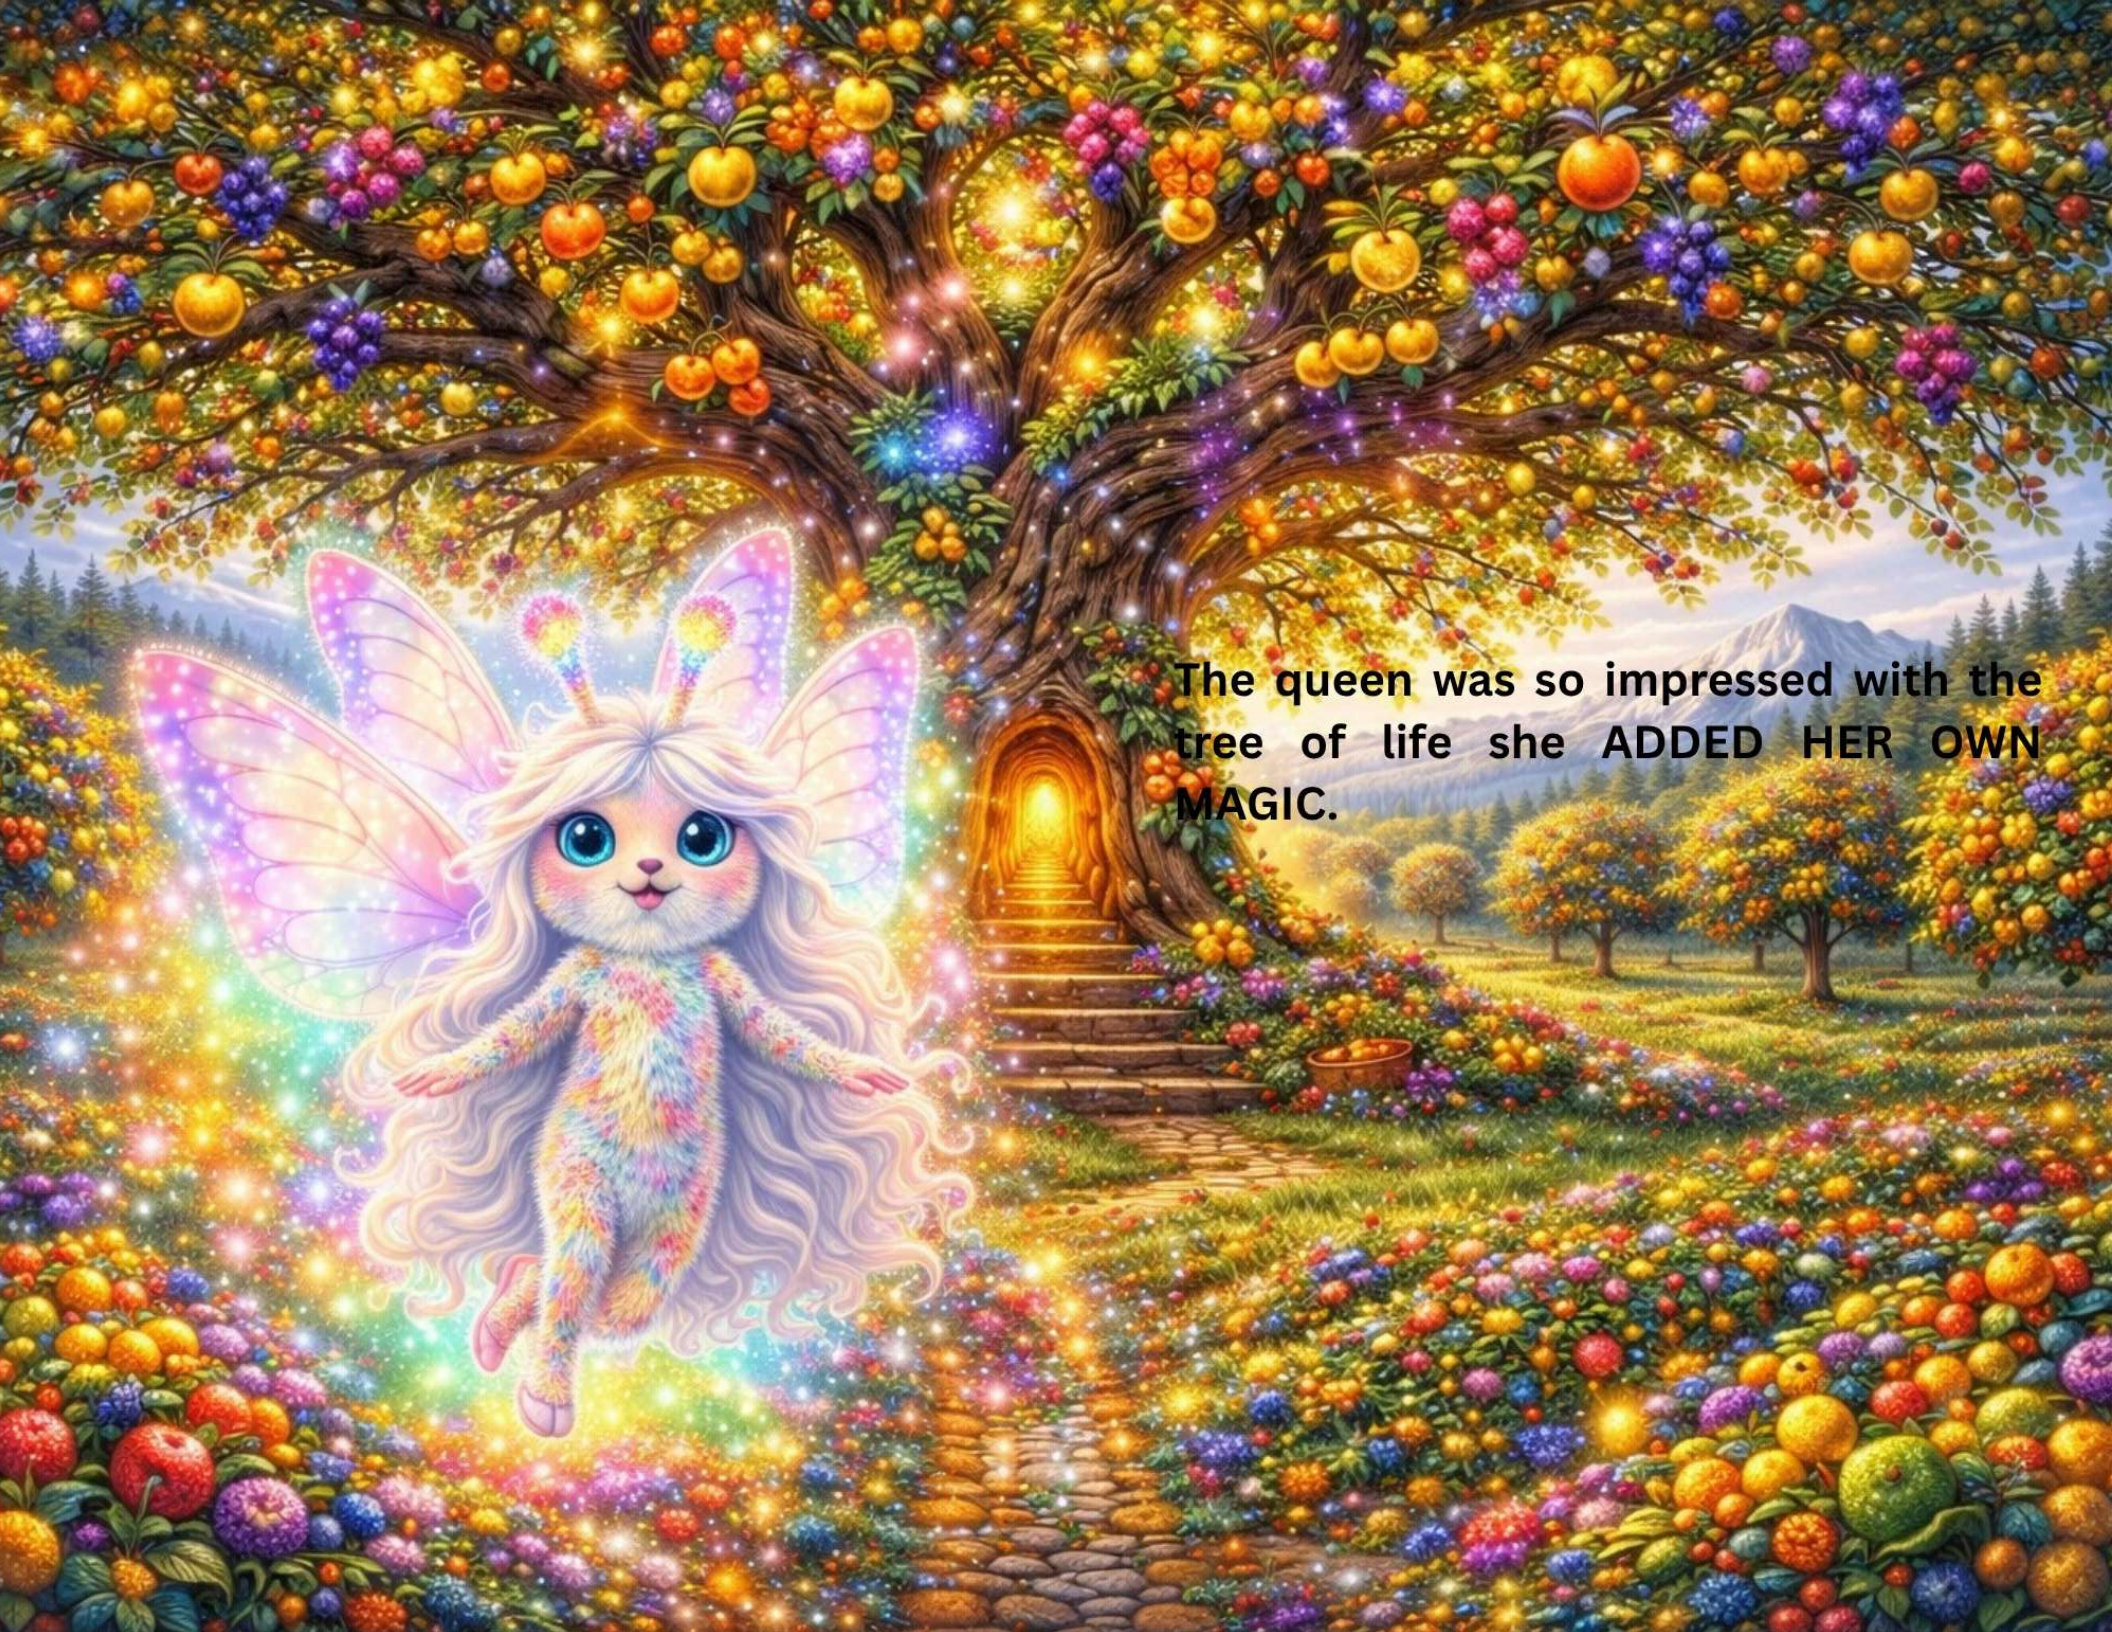

The moon beings embarked on a journey
back to Earth with gifts.

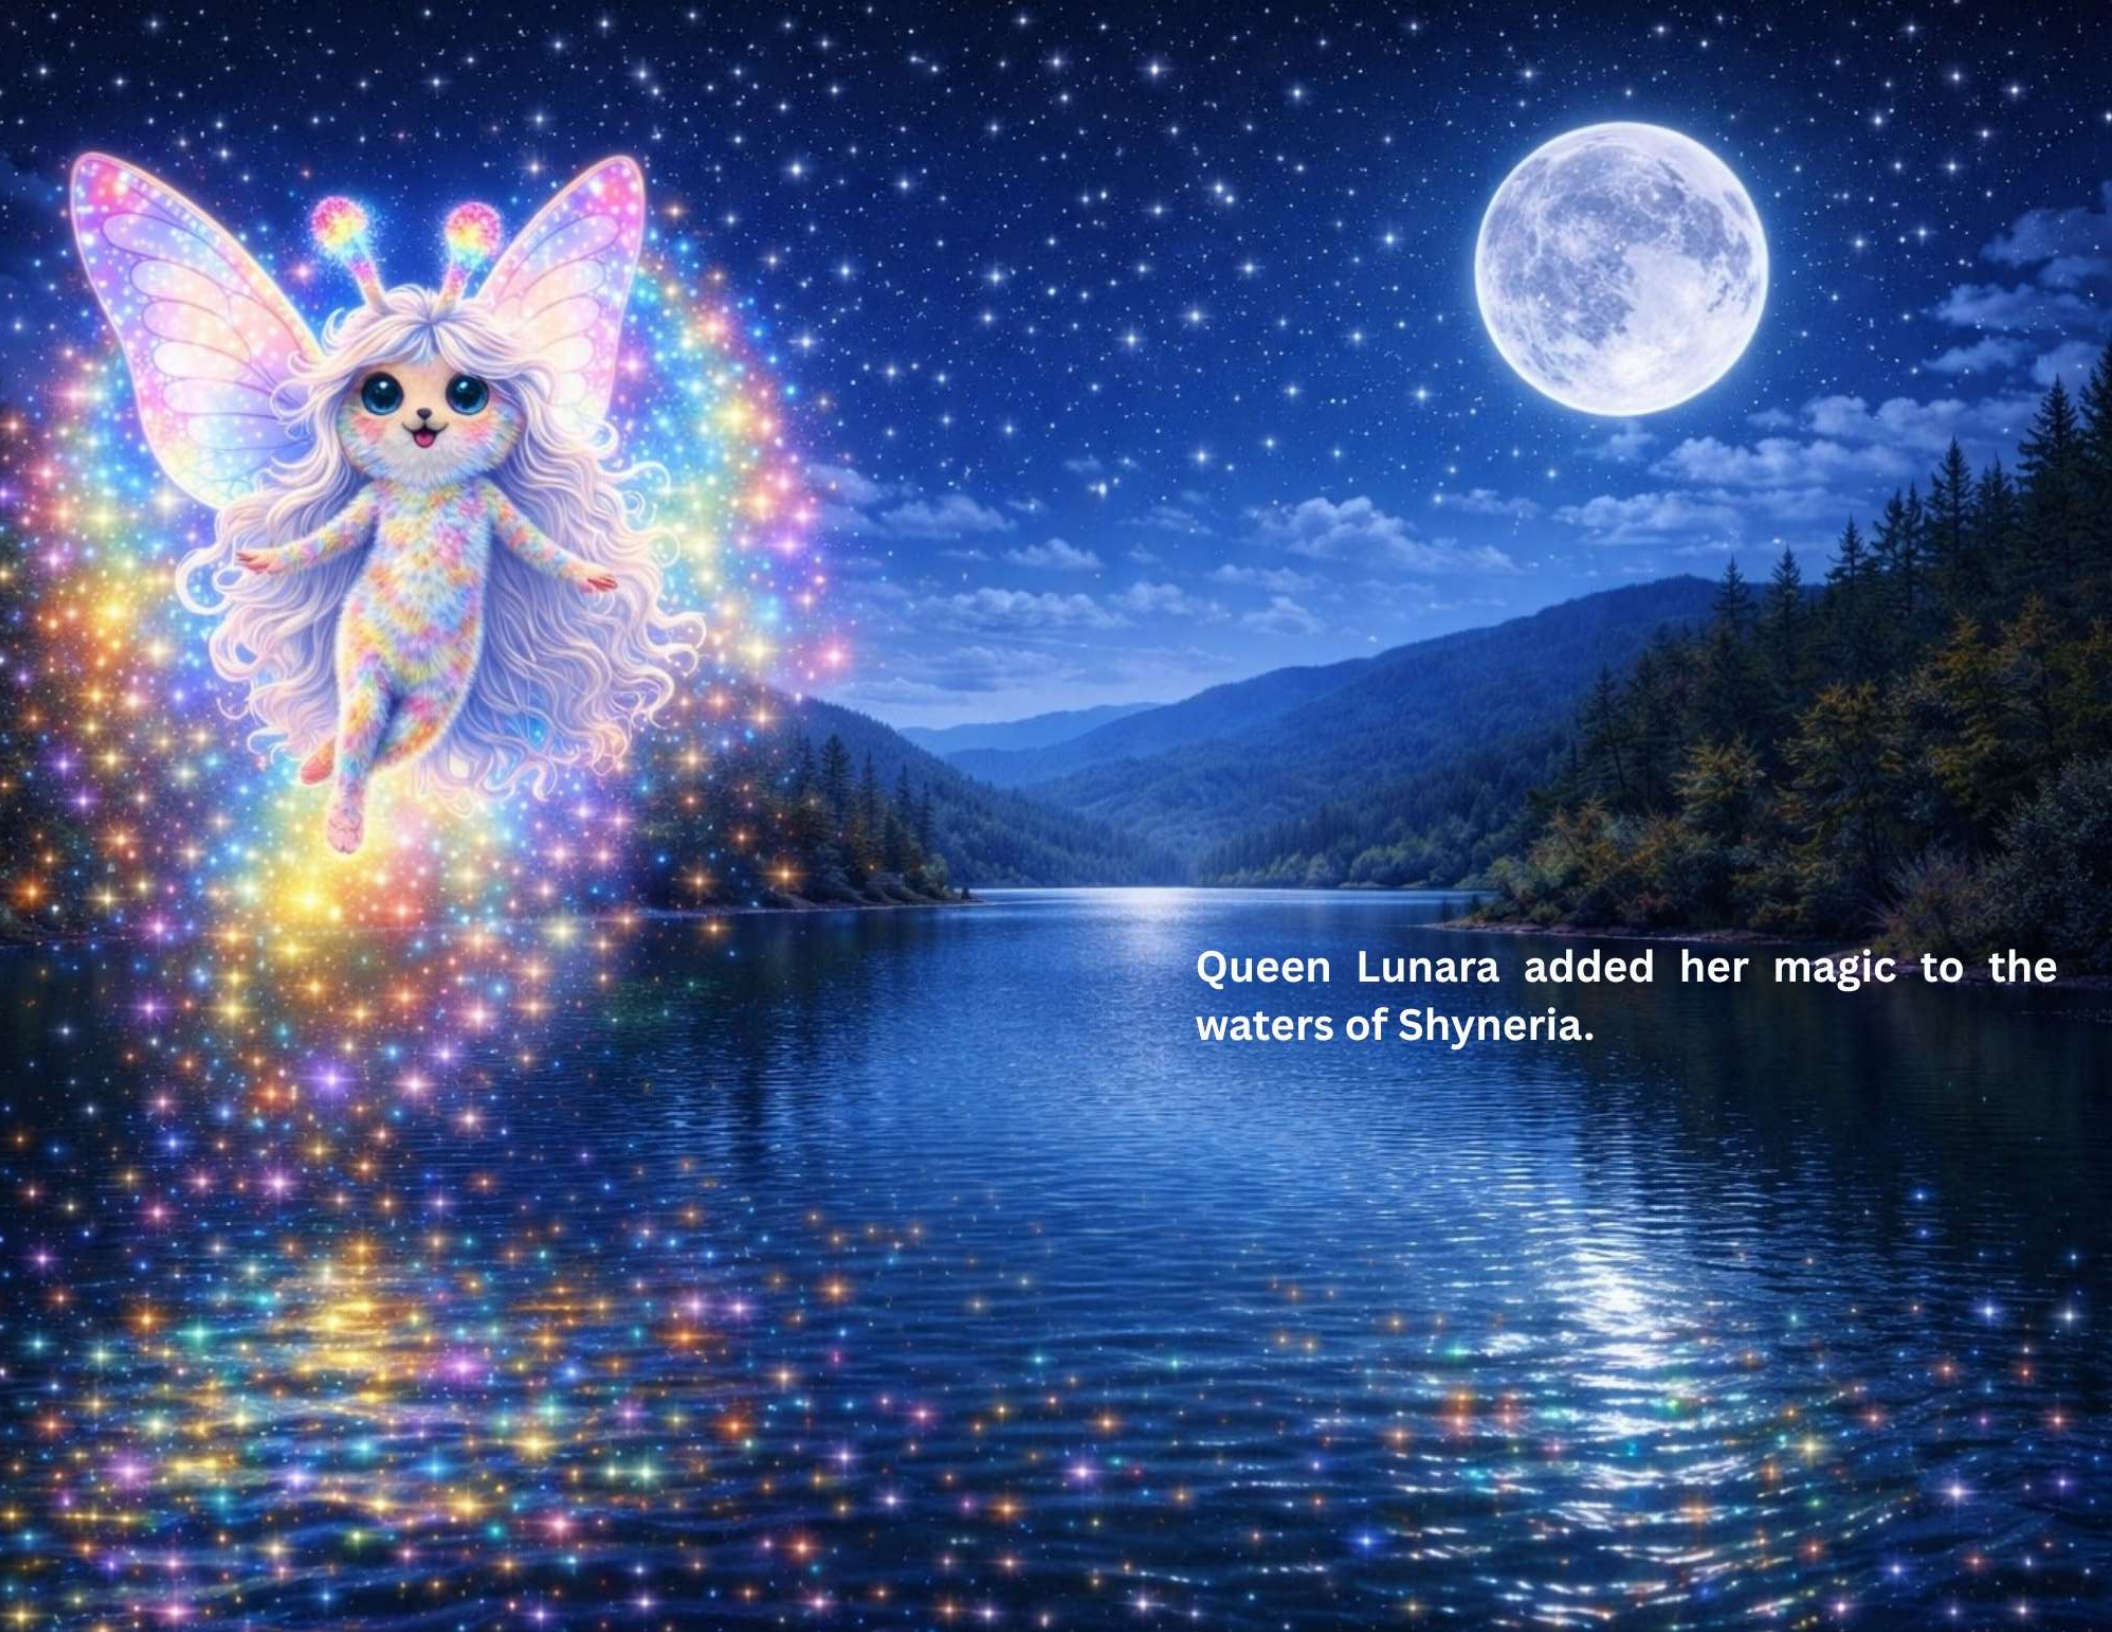

A journey so important that the Queen herself joined along.

Queen Lunara was excited to meet the people of Shyneria and rejoiced in the new friendship.

Lunara surveyed the fields with the new growth. The season was looking bountiful.

The queen was so impressed with the tree of life she ADDED HER OWN MAGIC.

Queen Lunara added her magic to the waters of Shyneria.

Queen Lunara was invited to teach the children of Shyneria.

Evapiration
Lake
Lake
Snow & Runoff

The adults of Shyneria gathered to learn all they could of their new friends and the magic which they brought.
Moon Phases

Feeling the excitement of the magic take hold of her Queen Lunara expands and enters the gates.

First stop Africa. The queen spread her magic among the land.

On to Australia she went. Spreading more magic to the land.

The day ends in China for Queen Lunara. Spreading magic to our lands. Where will the Queen go next!

Queen of the Moon
& Water Enchantress

Make Tides in a Bowl!

A simple experiment to see how tides work.

You'll Need:

- ☑ A bowl of water
- ☑ A spoon or ball
- ☑ Imaginary moon!

1 Fill the bowl with water

TIP: Pretend the spoon is like the Moon "pulling" the water!

2 Start the "tide"

Move the spoon slowly around the edge of the water.

See the water rise and slosh to one side.

3 Watch the water!

TIP: Pretend the spoon is like the Moon "pulling" the water!

4 Think like the moon...

Use the spoon like the moon pulling the tide.

The Moon pulls on Earth's water. That's what makes the tides!

Make Rain in a Cup!

A fun experiment to see how rain forms.

You'll Need:

- [x] A clear cup
- [x] Water
- [x] Shaving cream
- [x] Food coloring drops

1 Fill the cup with water

TIP: Fill the cup nearly to the top.

2 Add a puffy "cloud"

Tipt bourt white shaving cream.

TIP: Add enough to form a thick, puffy cloud.

3 Make it rain!

TIP: Pick your favorite color raindrops!

4 Watch the rain fall!

The heavy "rain" falls through the cloud!

Rain falls from heavy clouds full of water! That's the water cycle!

Shyneria Tip

The water in the cup is like the water in the sky!

Float an Egg in Salt Water!

A fun experiment with floating & sinking!

You'll Need:

- ☑ 2 cups of water
- ☑ Salt
- ☑ An egg

1 Sink the egg

Place an egg in the first cup of plain water.

TIP: Keep stirring until the salt is all mixed in.

2 Make salt water

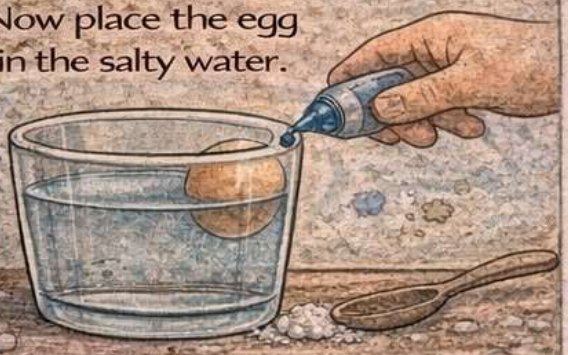

Stir 5 or 6 big spoonfuls of salt into the other cup.

TIP: Keep stirring until the salt is all mixed in.

3 Float the egg!

Now place the egg in the salty water.

TIP: See what happens!

4 Make a water world!

Try adding blue food coloring to the salt water! You made a world where the egg floats!

TIP: The egg is floating in the ocean on top of the freshwater!

Salt water is stronger than plain water.
That's why we can float better in the ocean!

Shyneria Tip

The water in the cup is like the water in the sky!
