
Welcome to our Shyneria
A SMALL GLIMPSE INTO CHINA
WELCOME ALL

Lunara arrived in CHINA and the first thing that amazed her was the sheer size of the wall.

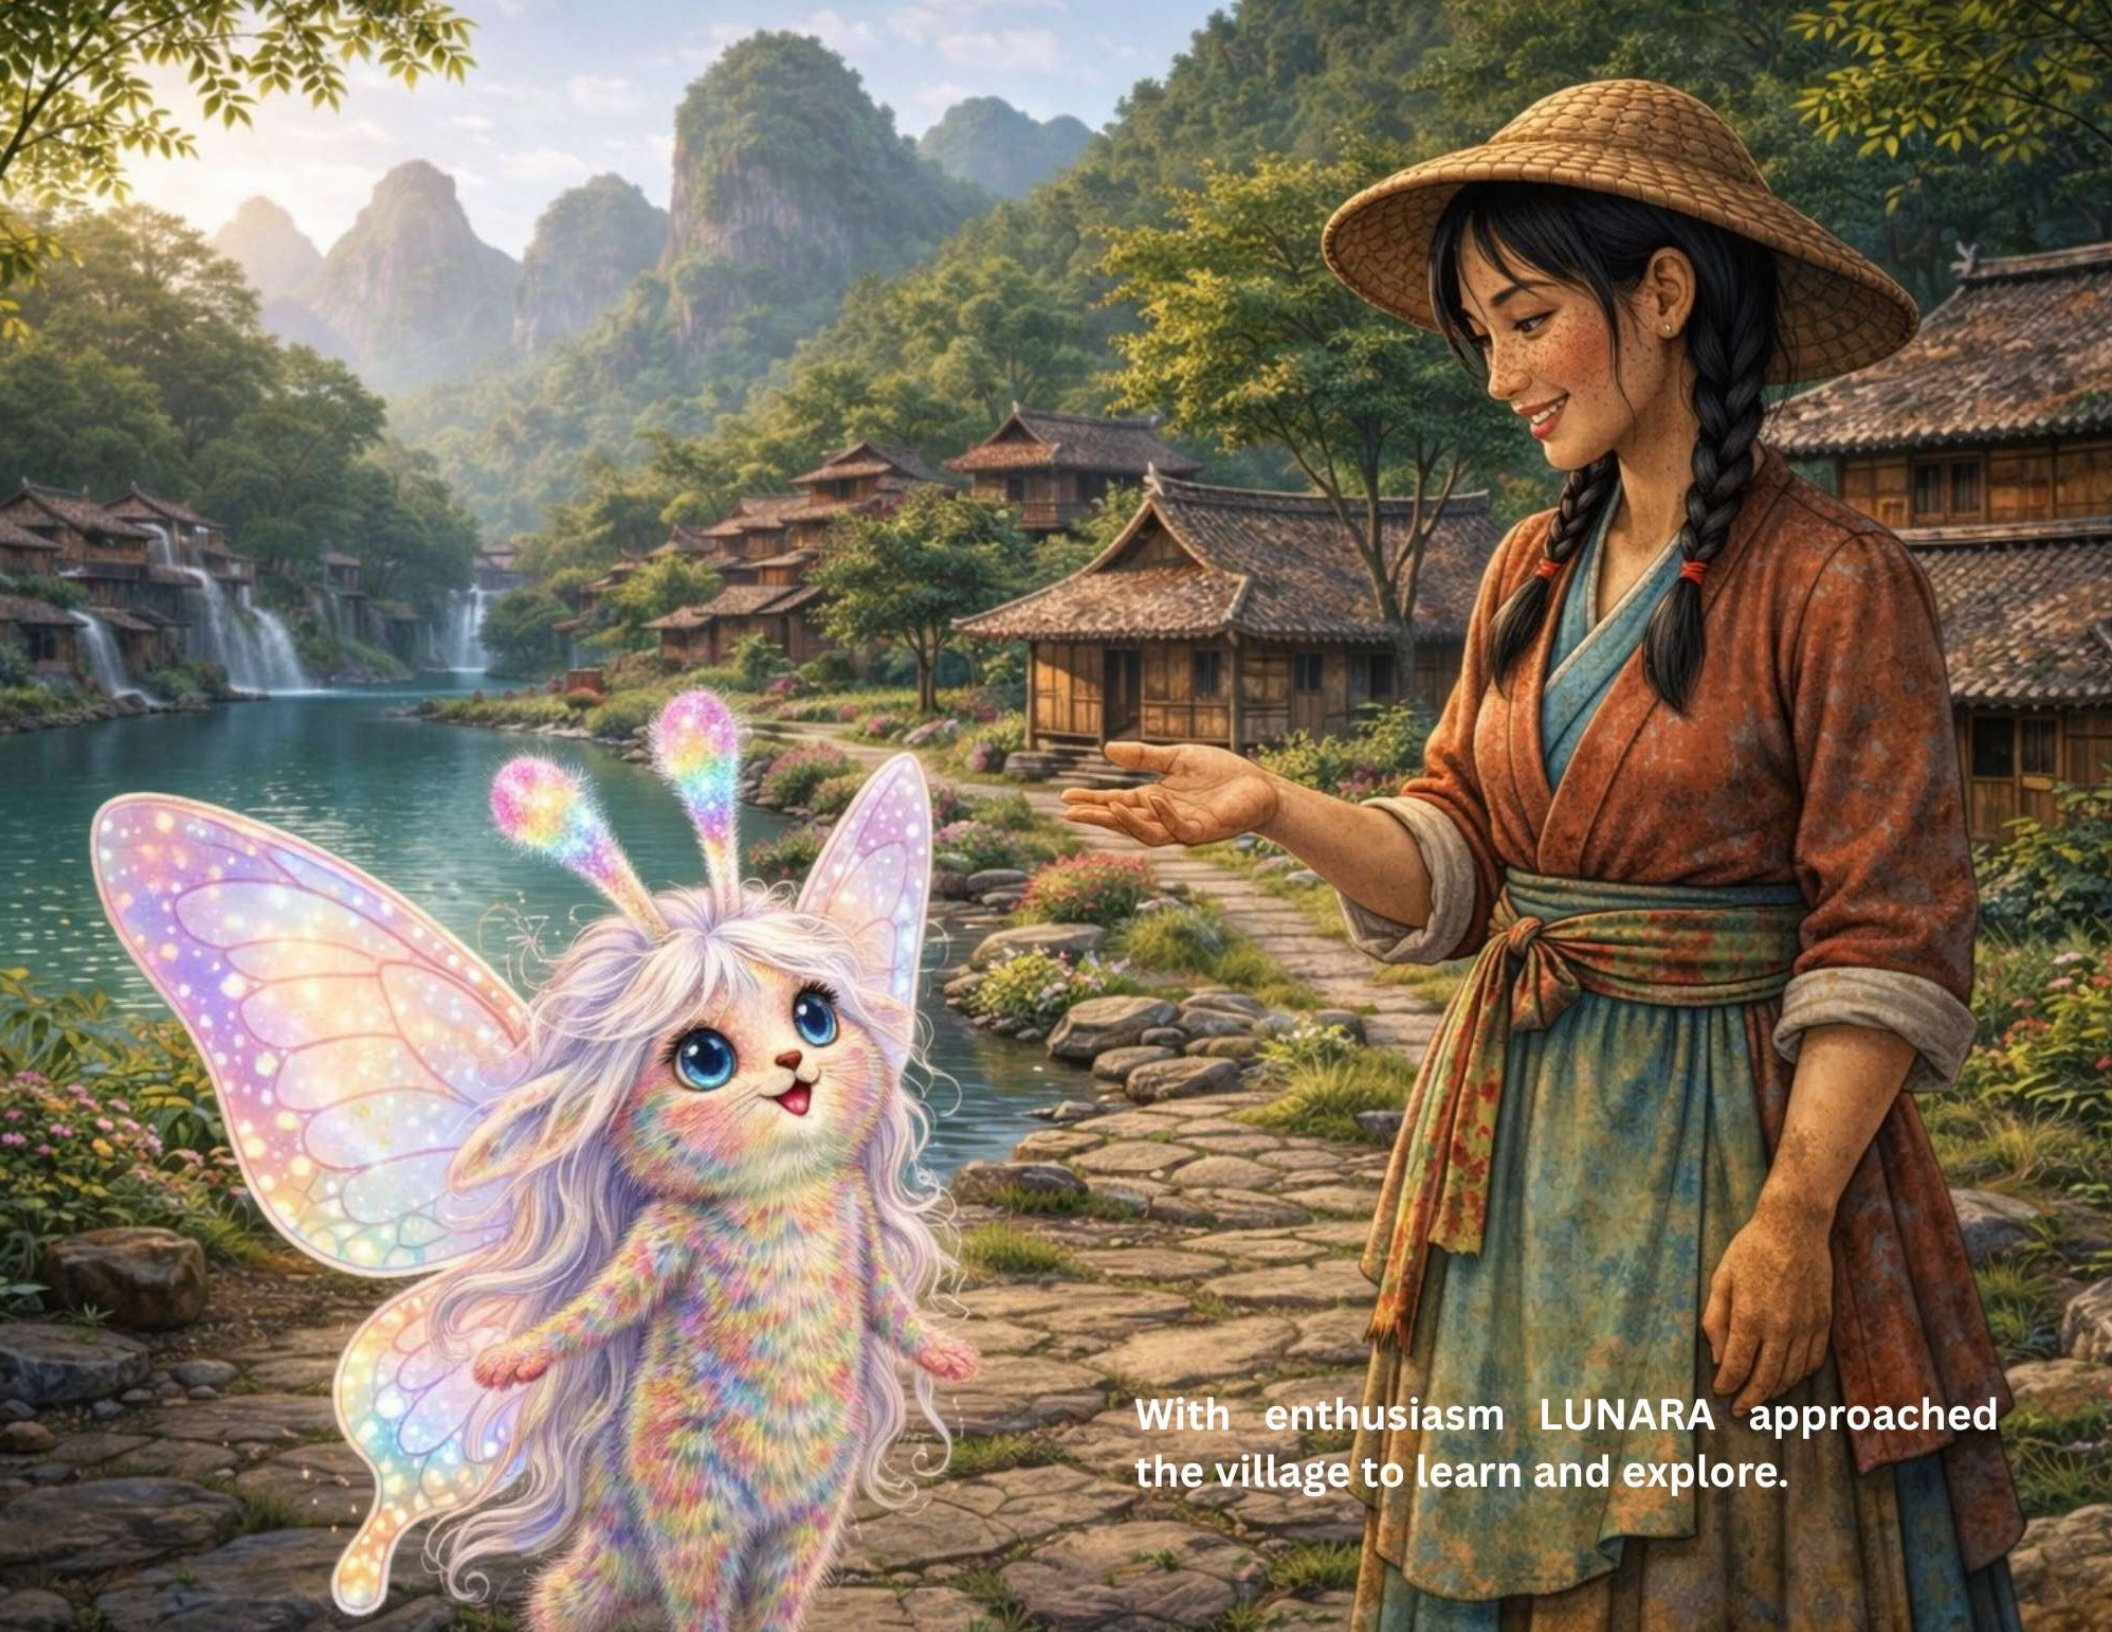

So large elephants were on the march and unloading all in one place.

Lunara saw the elephants were on their way to a village. The very same village the cave opening was near.

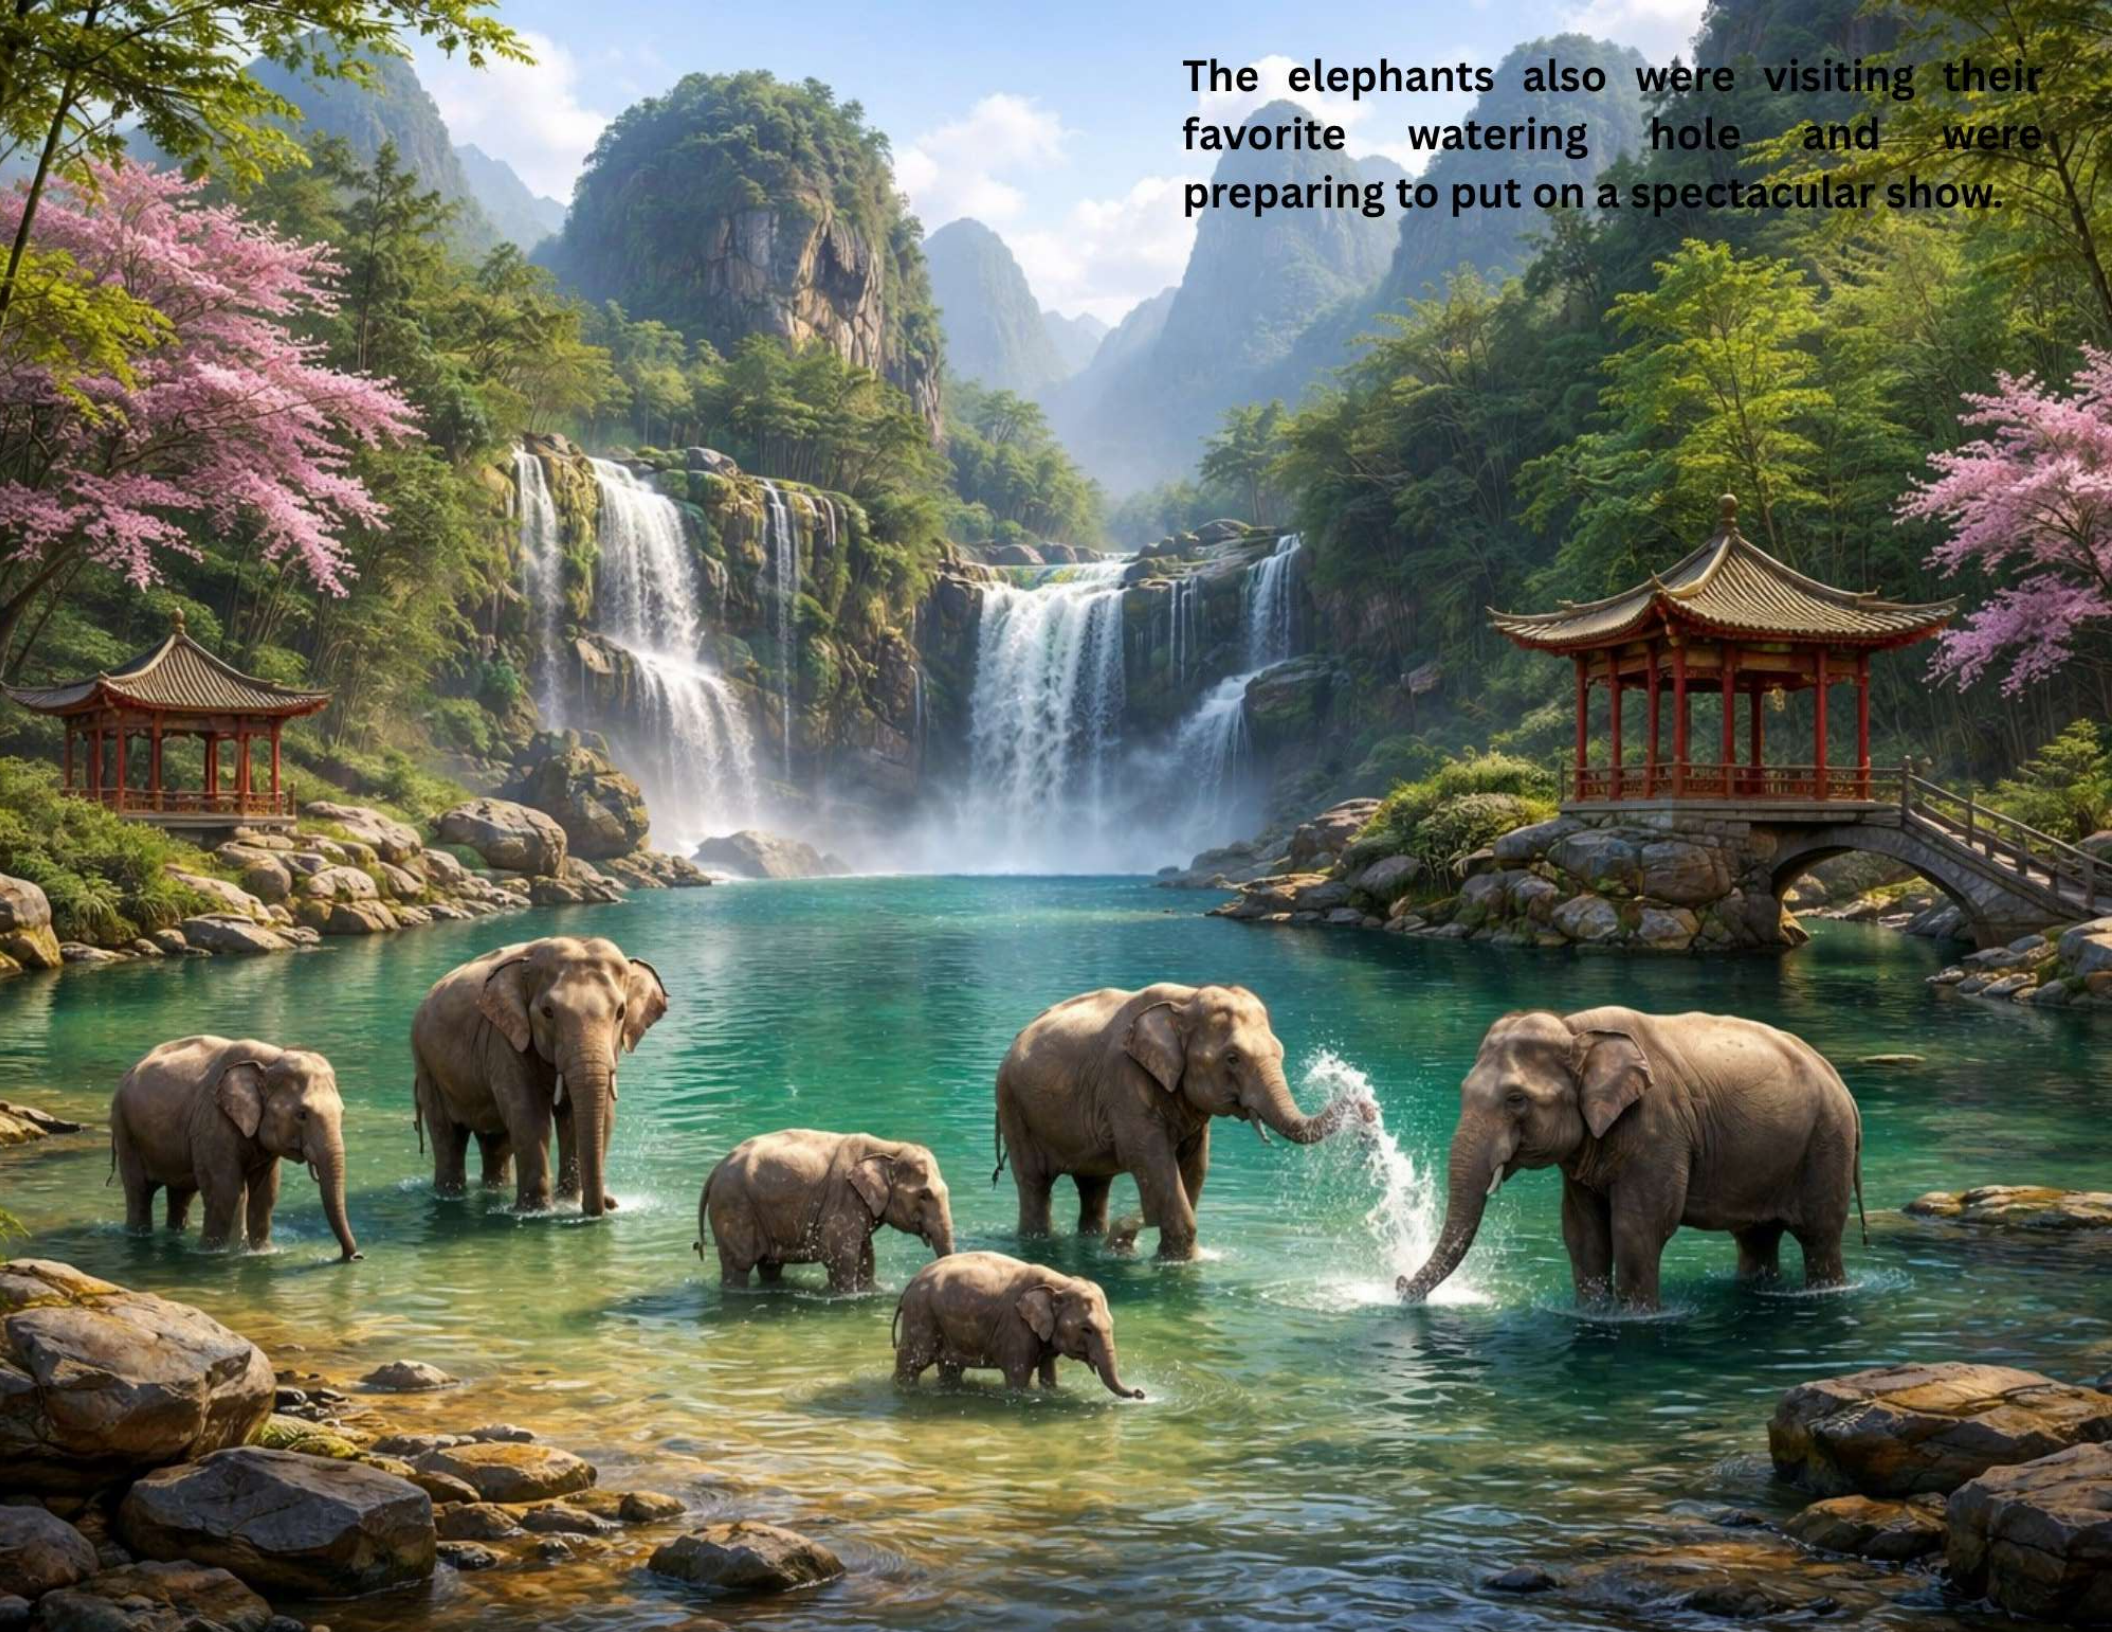

As she passed the elephants, she also passed endless fields of rice ready for harvest

With enthusiasm LUNARA approached
the village to learn and explore.

Lunara learned the elephants came to help with harvest.

The elephants also were visiting their favorite watering hole and were preparing to put on a spectacular show.

Lunara had an idea.

Lunara headed back to Shyneria and was able to extend an extra special invitation.

Sitting in awe they watched the spectacular show before them.

The elephants waited til nightfall and the used water and lights to celebrate the harvest.

The Shynerians stayed with their new friends to help bring in the harvest.
