
Welcome to our Shyneria
Australia Joins the Trail
WELCOME ALL

The caterpillars teach everyone in Shyneria all about their abilities and their land. The children listen with awe.

All the way across the world, the caterpillars had been shining bright at night.

The cave shining bright is in Australia. Two people go to inspect the glow. They do not understand the light or the TIME before their eyes. They enter the cave.

The cave leads them to another cave and a dock. They send their trusted companion out to see what they can find. Wattles.

Wattles finds people. Wattles finds Shyneria and Shynerians.

Wait. What is this? Their old friend Caden the Kangaroo is already in Shyneria. What delight!

Soon John and Jonny the two from Australia, meet more Shynerians already in the middle of a celebration.

The children rested inside with a afternoon puppet show.

As the children rested, others in Shyneria were busy at work. Even the new comers joined in the fun.

There was going to be a great treasure hunt. Shyneria was working away hiding treasures.

As the sun broke through the clouds and the rain lifted, children ran with baskets searching.

All the way down to the smallest joined in. Eagerly hunting for little treasures.

Come join us at the table in Shyneria for a feast!

Glow Cave Lantern

Classroom Craft Project
